Profile

I'm a software engineer with experience in designing and building software for different platforms. I'm skilled in coding, problem-solving, and creating efficient solutions. I work with both front-end and back-end technologies and handle the software development process, from design to deployment. I'm passionate about making user-friendly apps, websites and always look for ways to learn and improve my skills.

Work Experience

Frontend Developer | Soft Erena, Gujranwala, PK | April 2024 – June 2024

Developed responsive web interfaces using React.js and Tailwind CSS for client dashboards and admin panels. Integrated Firebase for real-time data sync and user authentication in a rental services web app. Collaborated with UI/UX designers to improve usability, resulting in a 25% increase in customer retention.

Full Stack Developer | Tesnova Solutions, Gujranwala, PK | August 2024 –January 2026

Developed cross-platform mobile applications using **React Native**, delivering scalable and performance-optimized apps for Android and iOS. Integrated **Node.js and Python-based backends**, implementing secure authentication, real-time data handling, and RESTful APIs. Worked on **AI-driven features**. Additionally, built supporting web applications using **Next.js**, with **Firebase and SQL** for authentication and data management, and designed responsive user interfaces using **Tailwind CSS**.

Education

BS Software Engineering

Gift University, Gujranwala

Aug - 2025

Intermediate in ICS

Apex College, Gujranwala

September – 2021

Matriculation in Computer Science

Pakistan Model High School, Gujranwala

February - 2019

Projects

- **Doctor Appointment System:**

An app for booking doctor appointments with features like slot availability and notifications and many more. Built using React Native.

- **Car Rental System:**

An app that lets users browse, book cars, make payments, chat, booking confirmations and implement some machine learning models and also Real Time Live Tracking. Developed with React Native.

- **Zikr Soul App:**

A live cross-platform mobile application developed using React Native, featuring secure authentication, an AI-powered chat system, and integrations with Quran and Hadith APIs for enriched content. The app also includes an in-app audio player and multiple interactive features, with strong backend support focused on performance, scalability, and real-time user engagement.

- **Hey Bensen App:**

A live mobile application developed with React Native, featuring secure authentication, friend invitations, real-time chat, and AI-powered event creation. Worked on implementing key features to enhance user interaction and engagement, with robust backend support for performance and scalability.

- **Loan Application:**

A platform for users to apply for loans, calculate eligibility, submit documents and many more. Built using React Native.

- **Wellness Fitness App:**

Developed a cross-platform wellness app using React Native for Android and iOS. The app tracks daily steps, calories, and fitness goals with interactive charts and personalized AI insights. Includes activity reminders and offline progress tracking.

- **Tesnova Solution:**

A mobile application developed using React Native, featuring secure authentication with Firebase, food ordering, and calorie tracking. Built for multiple restaurants with white-label support, and includes advanced features like real-time menu updates, personalized recommendations, analytics, and many more to enhance user experience and engagement.

- **Wellness landing Page (Next.js):**

Built a visually appealing Wellness & Fitness landing page using Next.js and Tailwind CSS. Showcases app features, benefits, and testimonials with responsive design, scroll animations, and fast page loading for an enhanced user experience.

- **Restaurant Food Ordering Website (React.js):**

A web-based platform where users can browse restaurant menus, place food orders, and

make payments. Inspired by Food panda, it provides a user-friendly interface for customers and restaurant management.

- **TeamUp Website (Next.js):**

Developed a fully responsive website using Next.js and Tailwind CSS. Showcases key features of the TeamUp platform with smooth animations, modern UI, and optimized SEO. Includes an interactive demo section where users can explore how the platform works, enhancing engagement and usability.

- **Foodie App - React Native App:**

A mobile application developed using React Native, featuring secure authentication with Firebase, food ordering, and calorie tracking. Built for multiple restaurants with white-label support, and includes advanced features like real-time menu updates, personalized recommendations, analytics, and many more to enhance user experience and engagement.

- **Sentiment Analysis (Python + ML):**

A machine learning project that analyzes and classifies text into positive, negative, or neutral sentiments using Python. Trained on sample datasets to understand emotional tone in reviews or comments.

- **Child and Adult Detection (Python + ML):**

A computer vision model that detects and differentiates between children and adults using facial features. Built using machine learning algorithms and image processing in Python.

Technical Skills

Frontend:

React.js, React Native, Next.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS,

Backend:

Node.js, Express.js, RESTful APIs, Python, TypeScript

Mobile Development:

React Native, Expo

Database:

Firebase, MongoDB, SQL

Version Control & Tools:

GitHub, Postman, VS Code, Cursor

Other Skills:

Authentication (Firebase Auth), Chat Features, AI
