PROFILE

Full-stack software engineer with 2+ years of experience building and shipping production web and mobile applications using React.js, React Native, Next.js, and Node.js. Strong track record of delivering AI-integrated, real-time features end-to-end from API design and database architecture to deployment and QA. Comfortable owning a product area independently and collaborating closely with design and backend teams to ship user-friendly, scalable solutions.

WORK EXPERIENCE

Full Stack Developer & SQA | Devline Solutions, Lahore, PK

April 2026 – Present

- Build and maintain web applications using Next.js, Node.js, and SQL, working across the full stack from database schema to UI.
- Design and implement RESTful APIs and authentication flows, and manage relational databases supporting core application features.
- Own quality assurance for shipped features — writing test cases, executing manual and regression testing, and triaging/fixing bugs before release.

Full Stack Developer | Tesnova Solutions, Gujranwala, PK

August 2025 – March 2026

- Developed cross-platform mobile and web applications using React Native and Next.js, from UI implementation through to production release.
- Built and integrated a Node.js backend with RESTful APIs, secure authentication, and Firebase and SQL data layers to support application features.
- Implemented AI-powered features within product workflows, and styled interfaces with Tailwind CSS for a consistent, responsive UI.

Frontend Developer Internship | Soft Erena, Gujranwala, PK

April 2024 – July 2024

- Built responsive, production web applications using React.js and Tailwind CSS, translating UI/UX designs into functioning interfaces.
- Implemented real-time data synchronization and user authentication using Firebase, collaborating with designers to refine UX.

PROJECTS

Zikr Soul (App & Website) — Next js, React Native, Firebase, AI Chat

- Live cross-platform mobile app and website with secure authentication, an AI-powered chat system, and Quran/Hadith API integrations for enriched Islamic content.
- Built an in-app audio player and multiple interactive features on a backend designed for performance, scalability, and real-time engagement.

Hey Bensen — Next js, React Native (App & Website)

- Live mobile application and website with secure authentication, friend invitations, real-time chat, and AI-powered event creation.
- Implemented core features on a scalable, high-performance backend supporting real-time social interactions.

Halal Management System — Next.js, Node.js

- Multi-role platform with Admin, Client, and Vendor panels for managing halal services and bookings.
- Integrated Stripe for secure payments, real-time chat for communication, and Google Maps for location-based services.

Car Rental System — React Native, Machine Learning

- App enabling users to browse and book cars, make payments, chat, and receive booking confirmations.
- Incorporated machine learning models and real-time live tracking for an enhanced booking and rental experience.

EDUCATION

BS Software Engineering

Gift University, Gujranwala

2021 – 2025

TECHNICAL SKILLS

Frontend: React.js, React Native, Next.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, TypeScript

Mobile: React Native, Expo

Database: Firebase, MongoDB, SQL

Tools: GitHub, Postman, VS Code, Cursor, Prismic, Docker

Other: Authentication systems, real-time chat features, AI integration, SQA/testing
